DPA 092 CLEANER- INSECTS

INSECT AND GREASY PARTICLE CLEANER

CLEANER INSECTS is a product specially designed for the problems that appear when trying to remove insects, adhering to the surface of cars on the front side. It is also exceptional for removing contamination from paint and varnish layers, leaving surfaces looking polished and restoring the original colour of the surfaces. It has the ability to remove oxidation residues on both painted surfaces and pure sheet metal. Professionals use it as a quick polish-brightener, to bring out the colours when looking at the finishing shades. The compound is harmless to any surface of the car (plastics, upholstery, leather, etc.), but aggressive to dirt and pollutants.
